

MINING AND SPECIAL APPLICATION JACKS

MAMMUT

HPM

HIGH - PERFORMANCE - MOTORPUMP

The new HPM motor pump, fitted on the M80/31, M80/42 and M100/40 jack, is the technological evolution of the previous version. Made of special materials to prevent corrosion and deformation even with intensive use and in adverse environments, it is free of any plastic parts to ensure long life and high performance.

With a performance improvement between 40% and 95% in terms of speed under load, and a frequency increased by 108%, it provides faster and more effective lifting even in the most severe conditions.

MAMMUT jacks are a safe and efficient lifting solution, suitable for vehicle maintenance in the mining, industrial, rail, construction, aviation, port and military industries.

Air-hydraulic operated, all models are equipped with **double descent valve** for a better control and a safer holding under load, with **automatic piston return**.

MAMMUT series has been designed to ensure excellent handling in use and transport:

- Extremely light, compact and easy to handle.
- Handlebar adjustable to 3 different positions for easy access and positioning under the vehicle to be lifted.
- Folding handlebar, which reduces the amount of space required when the jack is transported or not in use.
- Large pneumatic wheels, able to adapt to any ground.
- Special hooks that allow for safe lifting and easy transport.

The new **MAMMUT** series features several functional improvements in both operating safety and lifting performance, with the introduction of the remote control as standard and the **NEW HPM MOTOR PUMP**.

Available in a variety of models depending on lifting capacity and use, all jacks can be fitted with a wide range of accessories:

- *Load Blocking System (LBS)*
- *Extensions and extension holders*
- *Tilting plates*
- *and more...*
