

2-TON AIR BLADDER JACKS - two and three stage bag styles

model 92040 | 92041

model 92040

model 92041

The **ESCO PRO SERIES AIR BLADDER JACKS** are available in **2-STAGE (MODEL 92040)** and **3-STAGE (MODEL 92041)** designs, each with a 2-ton (4,000 lb.) lifting capacity for automotive, SUV, and light truck applications. With an extremely low starting height, they are ideal for body repair shops and low-profile lifting applications. Unlike traditional floor jacks, these models are 100% air-operated, eliminating hydraulic components for minimal maintenance. A dual safety valve prevents over-inflation and uncontrolled descent, ensuring safe and efficient operation.

EASY OPERATION

AIR UP AND AIR DOWN USING DUAL TRIGGER FOR PRECISE LIFTING AND LOWERING.

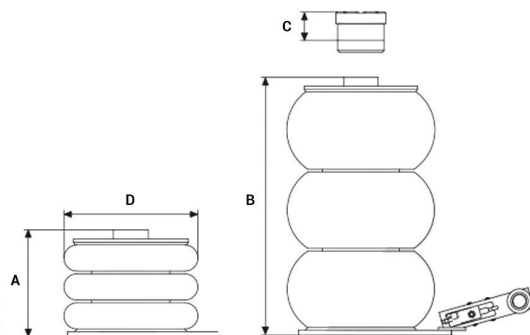

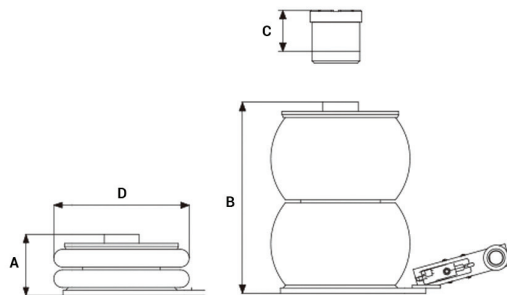

- Easy operation with simple up and down function.
- Suitable for both professional and hobbyist environments.
- Popular in collision repair shops and for use with frame machines.
- Perfect for brake, suspension, tire/wheel, and various other applications.
- 100% air-operated with built-in stabilization cylinder; minimum height of 4.5 inches. (model 92040)

included with model(s):
92040 & 92041

EACH UNIT COMES WITH AN **EXTENSION SADDLE** WITH HD RUBBER PAD FOR SUPERIOR STRENGTH AND ADDITIONAL REACHING HEIGHT.
